## OPUS® Testimonials

### Those who have tried it speak about it best

*The device will completely change the way I treat my patients. The unit will streamline appointments and make it easier to switch between supra and subgingival air polishing. With everything available on one unit it will enhance the patients' hygienist experience.*

**DH Sam Mc Hale (UK)**

*The device is what I've been waiting for... It's a good working workflow!*

**Dr. Frederik-Christian  
Hollay (Germany)**

*It's versatile, easy to use, easy to maintain, good looking, more efficient, less invasive, delicate, human-made with personal input.*

**Dr. Tea Natsvlishvili  
(Georgia)**

*OPUS® has raised the bar, keeping the smooth reliable scaler and making a duo unit is a game-changer. OPUS® is not just a machine but a partner in delivering exceptional patient care.*

**DH Charlotte Benson  
(UK)**

*It's a very well designed machine that helps giving patients the best quality treatment with high efficiency and pain free workflow.*

**DH Kareem Simdian  
(Belgium)**

*The air polishing is a nice experience for a patient.*

**DH Carlotta Becciani  
(Italy)**

*Wow! I'm impressed by the new OPUS®! Looking forward working with this machine in my practice.*

**DH Lisette Van Der Harst  
(Netherlands)**

From simple prophylaxis to complex treatments, OPUS® adapts to every procedure and patient condition. **Its versatility empowers you to work your way enhancing your skills, elevating standards, and meeting patient expectations.**

With OPUS®, you always find a minMAX solution: **minimal invasiveness and constraints, maximum performance and comfort achieved your way.**

For every **indication**, **one minMAX solution**

# NOW IT'S TIME

Smart Features, Effortless Control

# TO OPUS<sup>®</sup> YOUR WAY

Designed to intuitively make it yours

## Original Air polisher & Ultrasonic Scaling

Developed with dental professionals and backed by decades of expertise, OPUS<sup>®</sup> adapts to you, not the other way around. From its ergonomic interface to intelligent automatic adjustments, every detail simplifies your workflow, making it smoother and truly your own.

### Grab & Go Powder System

**No handling** – effortless bottle insertion and removal, with automatic pressurization triggered by pressing the foot pedal

**No refilling** – pre-filled bottles eliminate the need for manual powder transfer

**No cleaning** – sealed system prevents contamination and removes the need for cleaning

### Smart Handpiece Recognition

**Automatically detects** the handpiece and selects the appropriate mode.

### Responsive Touchscreen Interface

**Works perfectly** even with wet gloves.

**No hidden menu** – every essential function is visible at a glance.

### ColorDrive Control:

Intuitive color coding for instant treatment:

#### Ultrasonic mode:

Automatic power setting according to the selected indication

#### Airpolishing mode:

Automatic power and indication settings based on the inserted cleaning powder bottle

### Smart Foot Pedal

Four intuitive controls for total freedom and smooth transitions during procedures.

### Ergonomic Cart\*

Compact, mobile, and designed to fit seamlessly into any workspace.

\*Optional accessory

# POWERED BY OPUS®

## Exclusive OPUS® Ultrasonic features engineered to prevent vibration loss

### Strict controlled amplitude of vibration

Using high-frequency technology and linear vibrations, OPUS® technology allows a **constant vibration amplitude** and a precise area of action, **regardless of the chosen power level** or the clinical conditions encountered.

It effectively removes calculus while preserving the integrity of dental tissues. Newtron® technology's controlled amplitude ensures:

- Efficient intervention
- Minimally invasive treatment
- Reduced risk of microtrauma

### Controlled water flow for optimal cavitation

Precise irrigation control guarantees optimal cavitation at the end of the tip, maximizing biofilm degradation and improving disinfection of the treated area.<sup>1,2,3</sup>

The synergy between ultrasonics and irrigation enhances **antibacterial action**, essential for effective patient care.

## Exclusive clogging control system engineered to minimize clogging from the bottle to the nozzle

### Top-Aspiration Powder System

Unlike conventional systems that draw powder from the bottom, causing staging and agglomeration, OPUS® aspirates from the top, **creating a vortex** inside the powder bottle. This vortex ensures consistent powder flow into the pipe, minimizes waste, and prevents clogging.

### 2 Way delivery system

SILKY® air and powder pipes remain separate from the water channel until the top of the nozzle, **reducing the risk of clogging**.

Luminous screen with customizable modes and times, count curing time and load indicator.

- **Power**

2000mW/cm<sup>2</sup>  
(Ø7,5mm light guide).

3000mW/cm<sup>2</sup>  
(Ø5,5mm light guide - optional).

- **Optimal result**

3 modes to fit all clinical needs.

### FAST MODE

#### The choice of rapidity

Full power during 3, 4, 5 or 10 sec, according to the composite thickness.

### PULSE MODE

#### Limits temperature rise

5 or 10 flashes of 1 sec for a polymerization in security.

### RAMPING MODE

#### Avoids composites retraction

Progressive power increase during 9 or 15 sec to ensure perfect sealing of restoration.

# miniled standard

## • Fast

Only 6 to 12 sec to polymerize  
2mm composite.

## • Power

1250mW/cm<sup>2</sup>  
(Ø7,5mm light guide).

2000mW/cm<sup>2</sup>  
(Ø5,5mm light guide - optional).

## • Safety

Base-charger includes a radiometer for light power  
intensity check-up.

## • Optimal result

3 modes to fit all clinical needs.

### FAST MODE

#### Fast and easy

Full power during 10 sec  
(bip at 5 sec) on regular  
depth.

### PULSE MODE

#### Ally rapidity & safety

10 flashes of 1 sec  
(bip after 5 flashes)  
with times off to  
preserve dental pulp.

### RAMPING MODE

#### No stress cracking

Progressive power  
increase during 20 sec  
(bip every 5 sec) for  
a complete and safe  
curing.

2D/3D PAN device 5x5 to 12x10 floor installation  
Ref. W1203005.FL

# Exceptional clarity.

At the heart of the X-MIND® optima 3D is **state-of-the-art detector technology**, which guarantees exceptional image clarity and outstanding anatomical coverage. Its **comprehensive range of Fields of View (FOV)**, from 5x5 to 17x12\* cm (Ø x H), makes it suitable for a **wide range of dental procedures**, from general dentistry to orthodontics and maxillofacial surgery, while increasing tolerance for patient positioning and reducing the risk of marginal artifacts.

## EXTRAORDINARY CLARITY

Get the most out of quality with the brand-new **ClearIQ** filter

## OUTSTANDING VERSATILITY

From 5x5 to 17x12\*, a tailored solution for every clinical need

## TOP-LEVEL PERFORMANCE

Enhanced image depth with the new kV output range 60-90

## MAXIMUM PATIENT COMFORT

Quick and easy acquisition workflow

## AUTOMATIC POSITIONERS RECOGNITION

Maximum accuracy

## ZERO FOOTPRINT

Maximum accessibility

\* Option - The additional cost for the 17x12 version is €3,000

## 5x5 cm FOV

- Improves the **detection of root canals**, particularly in case of abnormal root canal shapes

## 8.5x5 cm FOV

- Useful for **implant surgery** and in **general dentistry** as a low dose exam as **limited to a single jaw**

## 8.5x9 cm FOV

- Useful for **complex implant surgery** as well as left or right TMJ diagnosis

## 12x10 cm FOV

- Suitable for most **oral surgery cases** including multiple implant surgery

## 17x12\* cm FOV

New

- Represents the perfect solution for **complex orthognathic cases**, **zygomatic implant planning** and **orthodontic surgery**

\* Option - The additional cost for the 17x12 version is €3,000

# Meet the 2D Prime Family

X-MIND® prime is available in three configurations: 2D wall mounted, 2D Ceph and 2D floor to suit all installation and clinical demands.

~~€27.786,47~~  
**€13.999**

**X-MIND® prime WALL 110-240V**  
Order code: W1200001

The ACTEON®s smallest extraoral 2D imaging solution ever for the maximum **accessibility in any context**.\*

~~€46.677,78~~

# PSPiX<sup>2</sup>

## is AUTONOMOUS

**The fully automated process free yourself from constraints**

Just drop the plate inside the slit, the PSPiX<sup>2</sup> will automatically detect the size, scan the plate, optimize the image, and send it instantly to your imaging software.

In the meantime, it will automatically erase and eject the plate for an immediate reuse or switch to standby mode.

**Scan  
simply &  
quickly**

## Fully automated process

—€8.525,20—

**€6.299**

Ref. S\_702\_0013

**1**

### Auto-access:

The door only opens when the imaging plate is inserted.

**2**

### Auto-detect:

PSPiX<sup>2</sup> automatically detects the size of the inserted imaging plate.

**3**

### Auto-scan:

PSPiX<sup>2</sup> scans and optimizes the image before displaying it into the right workstation.

**4**

### Auto-eject:

The imaging plate is automatically erased and ejected for an immediate reuse.

**5**

### Eco-mode:

PSPiX<sup>2</sup> automatically switches to economic mode when not in use for an extended period of time.
